

ENVIRONMENTAL POLICY STATEMENT

QMAC Construction Ltd is committed to Environmental matters as an integral part of our activities, products and services associated with refurbishment, maintenance and new builds and to that end are accredited with ISO 14001. To sustain this commitment, we will establish objectives and targets that consider environmental aspects for example undertaking projects that are subject of a 'very good' BREEAM rating. This is an integral part of our business decision making process and QMAC strictly adhere to the following principles:

COMPLIANCE

We will comply with all applicable environmental legislation, regulations, codes of good environmental practice and requirements to which we subscribe, related to our environmental aspects. We will implement programmes and procedures to assure compliance, taking account of the environment at all stages, including construction development, manufacturing and distribution operations.

PREVENTION

Proactively manage the impact on the environment through waste prevention and minimisation, re-use, recycling and ultimately safe disposal. To conserve energy and natural resources in the operations, we will seek to prevent pollution before it is produced and minimise waste at the source. We will consider environmental factors when making planning, purchasing or operating decisions. We will minimise risk and protect our employees and our neighbours by employing site technologies and operating procedures, adopting appropriate measures to manage environmental risk, including emergency response plans.

COMMUNICATION

We will put in place the necessary structures and resources, including the provision of appropriate environmental training and awareness programmes to educate employees to be environmentally responsible at work and at home. We will communicate this environmental policy to all those working for and on behalf of the company (including sub-contractors) and make it available to our suppliers and customers.

CONTINUOUS IMPROVEMENT

We will continuously seek opportunities to improve our adherence to these principles and work as a team to review and further strengthen our environmental objectives and targets in all aspects of the business.

RESPONSIBILITY

The company is committed to supplying products that meet or exceed the expectations of its customers while conducting its activities in an environmentally friendly and responsible manner.

The implementation and approval of this policy is the ultimate responsibility of the site directors. This policy is maintained and update by the site Environmental, Health & Safety Manager responsible in conjunction with the Environmental Management System team. This policy is made available to all employees, sub-contractors, clients and design team members.
